PROJECT: NAC-SLOGBAA ONLINE LEARNING PLATFORM

Note: *I have grouped the discussed system requirements into **functional** and **non-functional** requirements and also sectioned them with line separators.*

---

1. General System Overview

The system is a **training and content management website** with:

- A public-facing website (homepage, content, updates)
- An **online training platform** with modules, quizzes, progress tracking, and certification
- An **admin backend** with dashboards, analytics, and content management

---

2. Homepage & Public Website Requirements

2.1 Homepage Layout

- The **existing homepage structure must be retained**
- Improvements allowed for:
  - Visual appeal
  - Usability
  - Better images and styling
- Layout positioning should **not change**

2.2 Homepage Features

- **Image slider / carousel** on the hero section
  - At least 3 rotating images
- **About section** (About SLOGBA / organization) must remain
- **News & updates section**
  - Admin-manageable
  - Field must exist even if content is updated later
- **Impact Stories section**
  - Displays community stories

    - Each story contains:
        - Text
        - Image
        - "Read more" link to full content
- **Videos section**
    - Videos added via **YouTube links**
    - Admin pastes link → video displays automatically
- **Partners & logos section**
    - Supports adding multiple logos
    - Old logos must **not disappear** when new ones are added
    - Logos should auto-fit or wrap as needed
- **Social media links**
    - WhatsApp
    - Facebook
    - Twitter
    - Either:
        - Buttons linking to social pages, OR
        - Embedded Facebook feed (optional)

---

3. Content Management Requirements (Admin)

Admins must be able to:

- Add, edit, and delete:
    - Impact stories
    - Banner images
    - Documents
    - Videos (via YouTube links)
- Use simple input fields:
    - Text field

    - Image upload
    - Video link field
- Add content without developer involvement

---

4. User Roles & Access Control

4.1 User Roles

1. **Super Admin**
    - Full system access
    - Trainee management
    - Content management
    - Analytics & dashboards
2. **Admin**
    - View-only access
    - Filtering and reporting
    - Cannot edit or delete content
3. **Trainee**
    - Registered learner
    - Takes courses and quizzes
    - Views personal progress and certificates
4. **Public Visitor**
    - Can view public website content only
    - Cannot access training modules

---

5. Trainee Registration & Identity Management

The system must capture:

- Full name
- Email address
- Sex (Male / Female)

- District
- Physical address
- Trainee category:
    - Leader
    - Civil society member
    - Community member / citizen

Admins must be able to:

- Filter trainees by:
    - Gender
    - District
    - Trainee category

---

6. Online Training & Learning Modules

6.1 Module Structure

- Courses consist of **multiple modules**
- Modules consist of:
    - Text
    - Images
    - Videos (YouTube-based)
    - Activities
- Admins must be able to:
    - Dynamically add content blocks:
        - Text
        - Video
        - Image
        - Activity
        - Quiz

6.2 Learning Flow

- Trainees **must register and log in** to access training
- Trainees cannot access modules without an account
- Modules should be:
  - Visually engaging
  - Not text-heavy
  - Avoid overwhelming long section lists

---

7. Quizzes & Assessments

- Quizzes occur **after completing a module**
- Quiz features:
  - Automatic marking
  - Instant feedback
  - Score display
- Quiz rules:
  - Quiz cannot be taken before completing the module
  - Retakes allowed
  - Attempts and scores stored
- Quiz types:
  - Per module
  - Optionally per major topic within a module

---

8. Progress Tracking

The system must:

- Track:
  - Module completion
  - Quiz completion
  - Quiz scores
- Resume learning:

    - Trainees continue from where they stopped
    - No restarting from module 1 after logout
- Show progress to:
    - Trainees (personal dashboard)
    - Admins (aggregated data)

---

9. Certification

- Certificate generated automatically after course completion
- Certificate conditions:
    - Pass mark (e.g. ≥70% or ≥80%) – configurable
- Certificate delivery:
    - Downloadable from trainee's dashboard
    - Sent automatically to trainee's email
- Trainees must provide a valid email address

---

10. Dashboards & Analytics

10.1 Admin / Super Admin Dashboard

Must display:

- Total site visitors
- Total registered trainees
- Trainees in progress
- Graduated Trainees
- Failed Trainees
- Breakdown by:
    - Gender
    - District
    - Trainee category
- Visualizations:

    - Pie charts
    - Graphs
    - Summary statistics

10.2 Trainee Dashboard

- Progress overview
- Completed modules
- Pending modules
- Quiz results
- Certificate access

---

11. Library & Resources

- Library section for:
    - Documents
    - Reading materials
    - Policy documents
- Admin can upload and manage content

---

12. Live Sessions

- Live training integration required
- Should support:
    - Zoom OR Google Meet (decision pending)
- System should:
    - Generate or store live session links
    - Allow sharing links with trainees
    - Centralize live sessions within the platform

---

13. Non-Functional Requirements

- Modern, clean, responsive UI

- Good performance (no lag)
- Mobile-friendly
- Reuse existing design foundation where possible
- Scalable for additional courses
